

Enhancements in Aras Innovator 12.0 SP15

3D visualization supports new CAD versions.

- Added support for the following CAD versions: SolidWorks 2021.

1.1.1 Issues Fixed in Aras Innovator 12.0 SP15

Table 1: Framework

Issue #	Description
F-002025	Keyboard shortcuts can now be defined through the new CUI Commands data model, which supports the creation of custom shortcuts for specific ItemTypes and locations.
F-003721	Added support for the following CAD versions: SolidWorks 2021
F-003976	New API for Validate property event for future use in Validate event handling
F-003977	New API for Change property event for future use in Change event handling
I-021983, 086674	Corrected an error which was displayed when a file was uploaded to the Vault via IOM Stream Interface using a child Item created with "createRelatedItem", "createRelationship", "createPropertyItem", "addRelationship", "getLogicalChildren", "getParentItem", "getRelatedItem", "newAND", "newOR", "newNOT" functions.
I-024574, I-027169	Corrected an issue with MAC Policy in which the date constant would work incorrectly if local date/time did not match corporate or server date/time.
I-028552	Fixed an issue in which an Item was incorrectly put into Edit mode from View mode if the user clicked the [...] icon for a Multilingual property field.

Table 2: Container Deployment

Issue #	Description
I-025780	Fixed an issue in which the deployment of Innovator Server pods could fail.
I-027316	Corrected a case where adding an AICD deployment could disrupt open HTTP connections to Aras Innovator services.
