

Aras Innovator PLM Essentials

Training Course Description

Course

Aras Innovator PLM Essentials

Duration and class size

3 days; 20 participants

Format

This course is delivered remotely online, includes instructor-led demonstrations, and incorporates practical exercises for participants to gain practical learning experiences.

Target audience

Users, System Administrators, DevOps Engineers, and Developers that need to learn how to use the Product Lifecycle Management applications included with Aras Innovator.

Description

This 3-day hands-on training course combines lectures, exercises, and labs to introduce the Aras Innovator Product Engineering and Program Management applications. Attendees will learn how to create and manage the revisions of Parts and Documents, and link to each other building a configuration, using the Aras Product Engineering application. They also learn to release the items or entire configuration using some of the prebuilt ECOs with workflows and lifecycle states changing appropriately. Participants learn to create Project Templates, define Project Schedules, and initiate projects from these templates using Aras Program Management. Students will also share design ideas and drawing markups using Aras Visual Collaboration and create and manage Documents using the Aras Office Connector. They will also be introduced to some newer functionality including Dashboards, Widgets and Reports.

Prerequisites

- Basic familiarity with computer systems and enterprise applications

Learning Objectives

On completion of this course participants will be able to:

- Navigate in Aras Innovator system and perform business item queries
- Locate or Define items using extended classification and extended properties
- Create new Part and Document items and upload files
- Manage a Part BOM
- Use mass promote to manually progress a collection of Parts through a life cycle
- Release and Revise Parts and Documents using Engineering and Document Change Orders
- Create a Manufacturing Change Order (MCO) to edit an approved manufacturer list (AML)
- Create a Project Template and execute a Project Schedule
- Collaborate on Part and Document content using Visual Collaboration
- Use the Aras Office Connector to create and manage Documents and visually collaborate
- Create Dashboards including widgets for access to categories and reports
