SAAB

The road to ARAS for Saab

Starts @ Saab Automobile AB when there was a business need to replace the current GM owned Service Parts Release system "ETS" with a Saab owned tool.

The road to ARAS for Saab

Starts @ Saab Automobile AB when there was a business need to replace the current GM owned Service Parts Release system "ETS" with a Saab owned tool.

The requirement from the company was to also put a foundation in place to replace the GM owned Global Product Description System "GPDS" for Saab

New Requirements

With the decision to continue the "ETS" replacement new requirements was added.

The requirement was to also be able to produce
After Sales Engineering deliverables e.g.
Workshop information (methods, fault tracing etc.)
STM (Standard Time Mechanical, Labor time guide)
EPC (Parts catalogue)
