RELEASE NOTES

Aras Innovator
Innovator Version 29

Oracle EBS Version
12.2.10

FEATURES

Aras Innovator

- Restructured integration methods to reduce Aras db queries thus improving efficiency.
- Added support for Cluster ECO. This capability ensures that when publishing ECO updates to multiple organizations, the process should not commit data to the ERP database for any organization until all processes have successfully completed.
- Added support for List Of Value Retrieval from ERP. This capability ensures that the list of values In Aras Innovator are in sync with that defined in Oracle ERP

Oracle ERP

- Added support for Oracle Alternate BOM transfer when the ERP side BOM Diff is enabled.

Listener

- Added configurations for Cluster ECO.
- Added retry configuration in the listener. This configurable element defines the number of retry attempts between the 3DExperience server and the listener when transferring data, as well as the interval between each retry attempt.

BUGS FIXED

Description
Improved the connector logging by providing the detailed date/time stamp.

KNOWN ISSUES

None
