Send Us Your Comments

Aras Corporation welcomes your comments and suggestions on the quality and usefulness of this document. Your input is important in determining the information used for future revisions.

- Did you find any errors?
- Is the information presented?
- Do you need more information? If so, where and what level of detail?
- Are the examples correct? Do you need more examples?
- What features did you like most?

If you find any errors or have any other suggestions for improvement, indicate the document title and the chapter, section, and page number (if available).

1 Key Features and Enhancements

1.1 Digital signature support for NuGet packages

Aras Update 1.26 applies an organizational digital signature to the Aras.Update.Cmd and Aras.Update.Cmd.Package NuGet packages. Signed packages pass GovCloud package-integrity controls and can be synchronized into GovCloud environments.

1.2 Visual indication of operation success

The progress indicator for download operations now displays in green when an operation completes without errors. In previous versions, the indicator remained red regardless of the outcome, which could be mistaken for a failure. The indicator continues to display in red when an operation fails.

1.3 Increased timeout for reading packages

The client-side timeout for reading packages (for example, the GetPublicPackagesAsync call) has been changed from 100 seconds to 300 seconds. This addresses timeout failures that could occur on instances with a large number of packages or on slower network connections.

2 Fixed Issues

The following issues reported in Aras Update 1.25 are resolved in this release.

Feature / Issue #	Description
IH-19950	The Online Updates tab now shows a clear error message instead of "no updates available" when the update service returns an error.
IH-20440	The Online Applications tab now shows an error dialog instead of silently displaying an empty package list when the server returns an error.
IH-20324	A package with a broken Vault icon reference no longer prevents the entire package list from loading; the affected package now displays with the default icon.
IH-20266	Package labels now display in the language matching the Windows regional format, on both the Online Updates and Online Applications tabs.
IH-19913	Users without administrator permissions now see a clear message ("Administrator access to the Innovator instance is required") instead of a raw internal error.
IH-20388	Install and Download buttons are now accessible, and scrolling works correctly, when the Aras Update window is not maximized.
